

Master thesis in Landscape Architecture and Planning Heike Kaiser | Kassel University | Winter 2009/10

Introduction

Community Forests

- Play an important role within the overall urban green space
- Represent *nature* close to where people live
- Offer unique recreational settings
- Provide special educational environments

Professional objective

- To link recreational use and forest management by elaborating a sustainable and participatory development concept
- To illustrate how a better understandign of the interrelations between the local communities and their peri-urban forest is essential
 - >> for improving *forest management and use*
 - >> for enhancing *local identity*

Background

Community forest projects in Israel

- Jewish National Fund Land Development Agency (JNF-KKL): responsible public body for managing all forest in Israel
- In 2006: Introduction of Community Forest program
 - >> to improve the *conditions of peri-urban forests*
 - >> to meet the changing demands of society
- Balfour Forest: national pilot project
 - >> **Public participation process** limited to Migdal HaEmek started in 2008, still ongoing...
- To get involved during a voluntary internship in the JNF-KKL in 2009
 - >> decision to make the project the *subject of Master thesis*

Landscape analysis: Peri-urban region + planning area

Migdal HaEmek - Yafia - Ginegar // Planning area

- Location: near Nazareth in the Jezreel Valley, Lower Galilee, Israel
- Size: 420 ha

Migdal HaEmek - Yafia - Ginegar // Community characteristics

- Located between the following communities:
 - >> Migdal HaEmek // Jewish development town (1953) // 24,800 inhabitants
 - >> Yafia // old Arab town (ca. 1400 BC) // 17,500 inhabitants
 - >> Ginegar // Jewish kibbutz (1922) ?? 500 inhabitants
- Situated at a sociogeographic clashing point of multicultural societies!
- Differing opinion about Balfour Forest:

>> Migdal HaEmek: "Neglected backyard of the town"

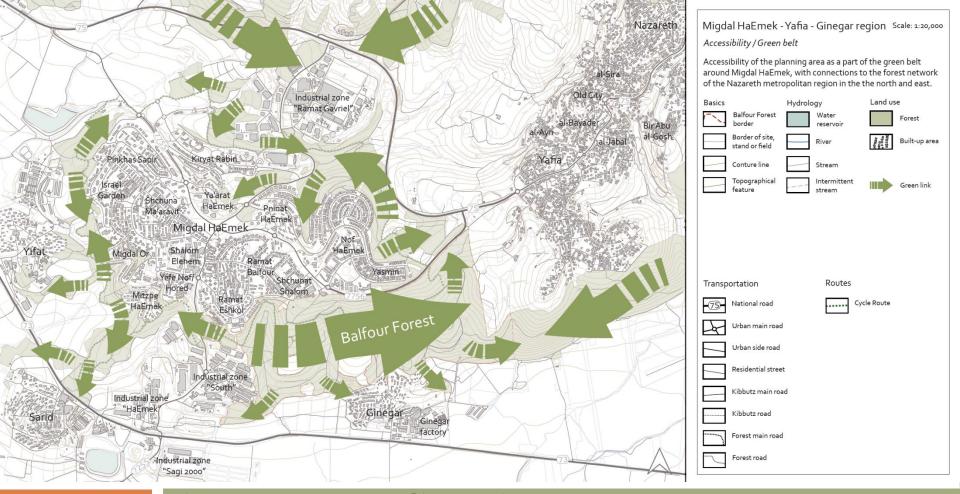

garbage, vandalism, insufficient infrastructre

>> Yafia: "Extended Jewish territory"

Planted by Jewish pioneers on former Arab agricultural land

>> Ginegar: "Spiritual landscape"

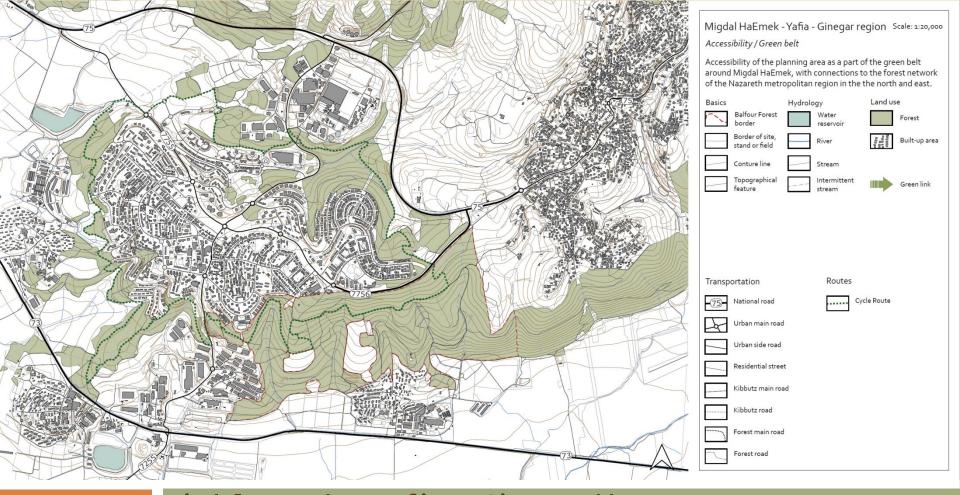

deep bonds to the forest since its establishment

Migdal HaEmek - Yafia - Ginegar //

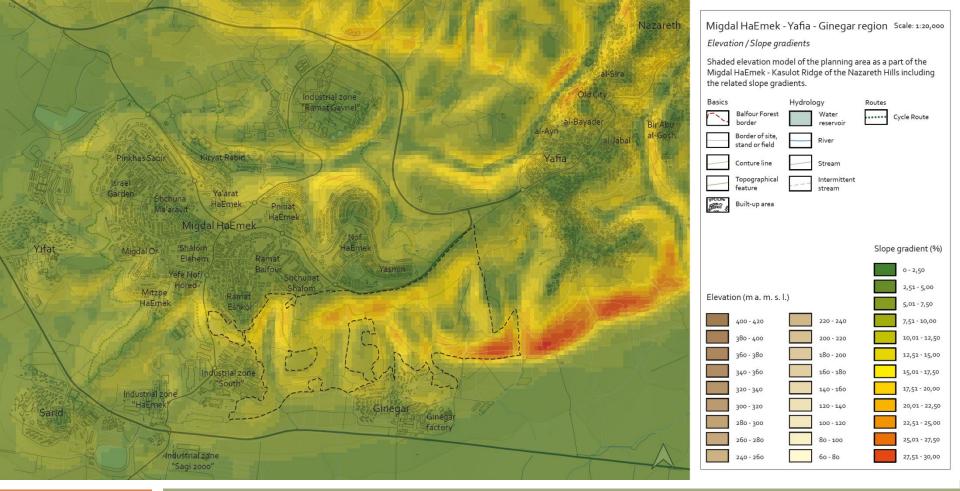

Green Belt

- Largest part of a Green Belt around Migdal HaEmek on an urban scale
- Green Links for flora and fauna towards other habitats
- Part of a replanted forest network around Nazareth on a metropolitan scale

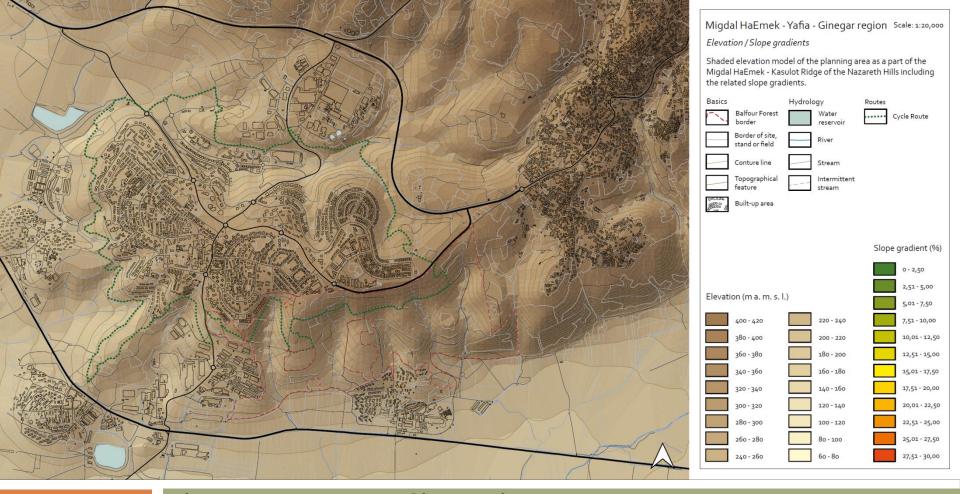

Migdal HaEmek - Yafia - Ginegar // Accessibility

- National road No. 75 (Nazareth) in the north
- National road No. 73 (Afula)) in the south
- Bike trail around Migdal HaEmek going through the northern part

Migdal HaEmek - Yafia - Ginegar // Grading scheme

- Part of the Migdal HaEmek Kasulot Ridge of the Nazareth Hills
- Slope gradients up to 20% in the northern parts
- Slope gradients up to 30% in the south-eastern part

Migdal HaEmek - Yafia - Ginegar // Elevation model

- Elevations between 160 360 m above sea level
- Five wadis running in north-south direction through the forest
- Another wadi on the eastern edge towards Yafia

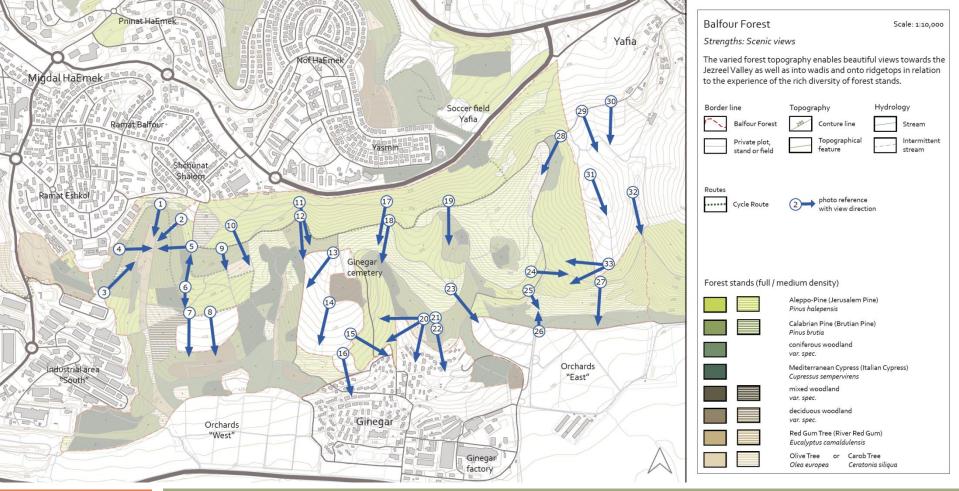

Balfour Forest // Landscape character

A peri-urban forest with mixed land uses:

- >> WoodLand mainly planted with conferous trees:
 Aleppo pine (Pinus halepensis) 32%,
 Calabrian pine (Pinus brutia) 18%,
 Mediterranean cypress (Cypressus sempervirens) 9%
- >> Wadis planted with River Red Gum (Eucalyptus camaldulensis)
- >> **Small groves** of Olive (Olea europea) and Carob (Ceratonia siliqua)
- >> Enclosed grasslands
- >> Phrygana ("batha")

A cultural landscape:

- >> representing the unique legacy of *forestation efforts in Israel* during the 20th century
- >> dating back as far as the *British Mandate Period* (1917-1948)
- >> Bearing traces of ancient settlements from the Bronze Age (3300-1200 BC)

Balfour Forest // strengths: Scenic views

- into the Jezreel Valley
- across the grasslands and the phrygana
- into the wadis

Balfour Forest // strengths: Forest stands

- Rich diversity of forest stands
- Mainly coniferous trees like pines and cypresses
- Also groves of olive and carob, and wadis with eucalyptus

Balfour Forest // Strengths:

View into Jezreel Valley

Balfour Forest // Strengths:
View across the grassland

Balfour Forest // Strenghs:
View from the batha area

Balfour Forest // Strenghts:
View from the olive grove

Balfour Forest // Strengths:
View into the eucalyptus wadi

Balfour Forest // Strengths & Weaknesses: Landscape features

- Important and unique vegetation areas
- Use conflicts and man-induced hazards: Vandalism, overgrazing, flaming
- Natural hazards: Seasonal dryness, pests

Balfour Forest // Strenghts:
Persian cyclamen

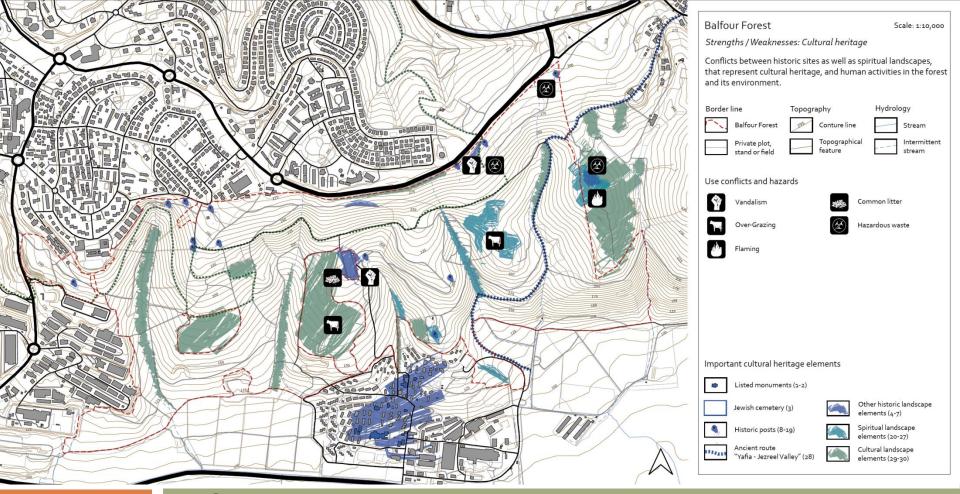

Balfour Forest // Strenghts:
Nazareth iris

Balfour Forest // Weaknesses:
Semi-pastoral farming / Overgrazing

Balfour Forest // Weaknesses:
Man-induced fires

Balfour Forest // Strengths & Weaknesses: Cultural heritage

- Antiquities from the Bronze Age
- Spiritual landscapes dating back to the establishment of the kibbutz
- Use conflicts and man-induced hazards: Vandalism, flaming, littering

Balfour Forest // Strenghts:
Antiquities from the Bronze Age

Balfour Forest // Strenghts:
Cave near the kibbutz

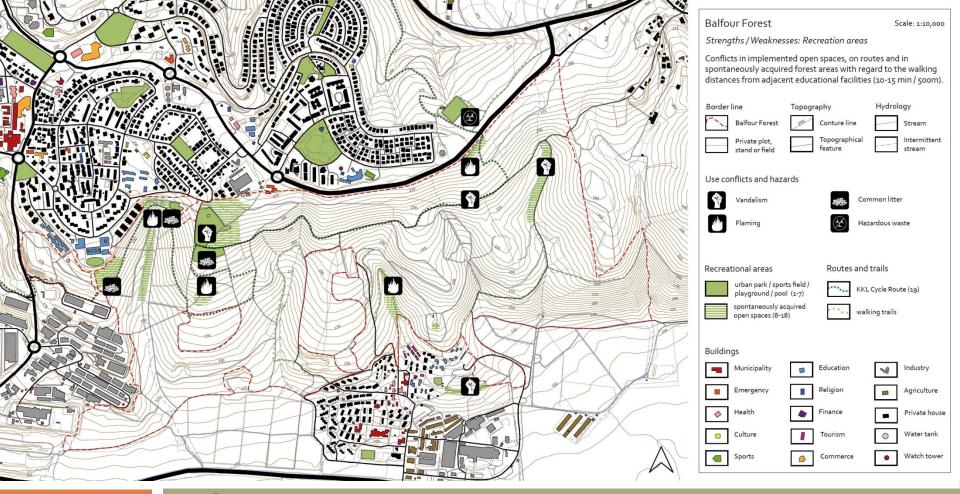

Balfour Forest // Strenghts:

Ginegar Cemetery

Balfour Forest // Weaknesses:

Vandalism of cultural sites

Balfour Forest // Strengths & Weaknesses: Recreation areas

- Existing infrastructure, e.g. bicycle trail
- Evidence of spontaneously acquired spaces
- Use conflicts and man-induced hazards: Flaming, vandalism, littering

Balfour Forest // Strenghts:

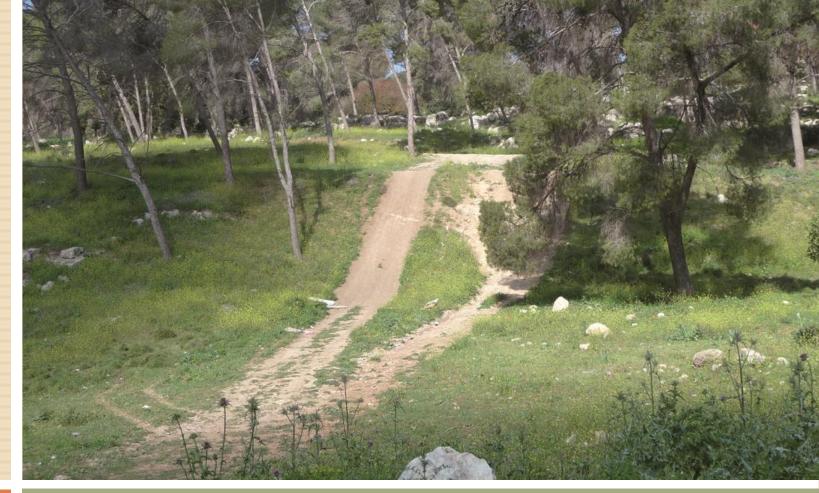

Spontaneously acquired places

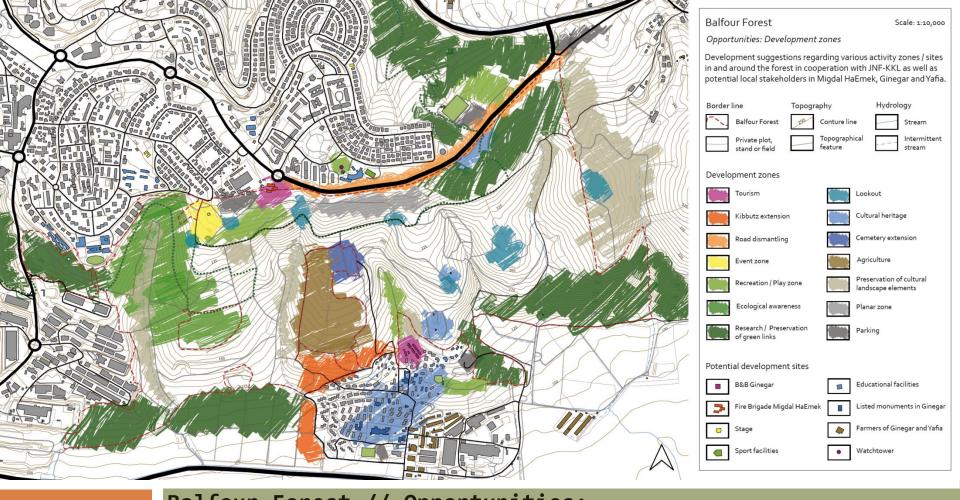

Balfour Forest // Strenghts:
Meeting places

Balfour Forest // Weaknesses:
Leftovers after the meeting

Balfour Forest // Weaknesses:
Landscape vandalism

Balfour Forest // Opportunities: Development zones

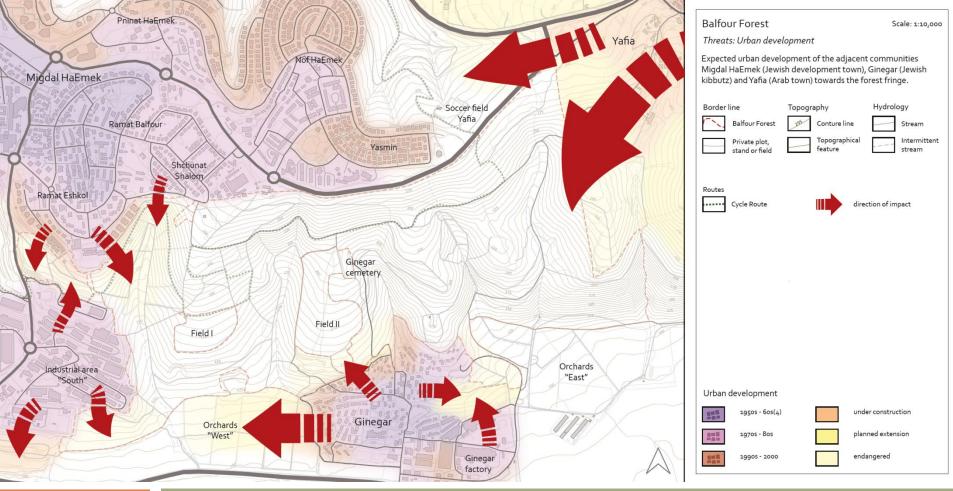

- Different development and activity zones
- Various activity sites in cooperation with local / regional partners
- Strengthening the forest fringe by buffer zones and Green Links

Balfour Forest // Opportunities:
Picnic place at the Carob tree

Balfour Forest // Opportunities: Forest partnerships

Balfour Forest // Threats: Building development

- Expanding residential areas from all sides
- Environmental hazards: man induced forest fires, pollution, soil degradation and bite originating from overgrazing
- Weak legal policies and insufficient enforcement of nuisances

Balfour Forest // Threats:
Building at the forest fringe

Balfour Forest // Threats:
Illegal litter dumping site

Conceptual design: Balfour Community Forest

Sustainability

Common definition:

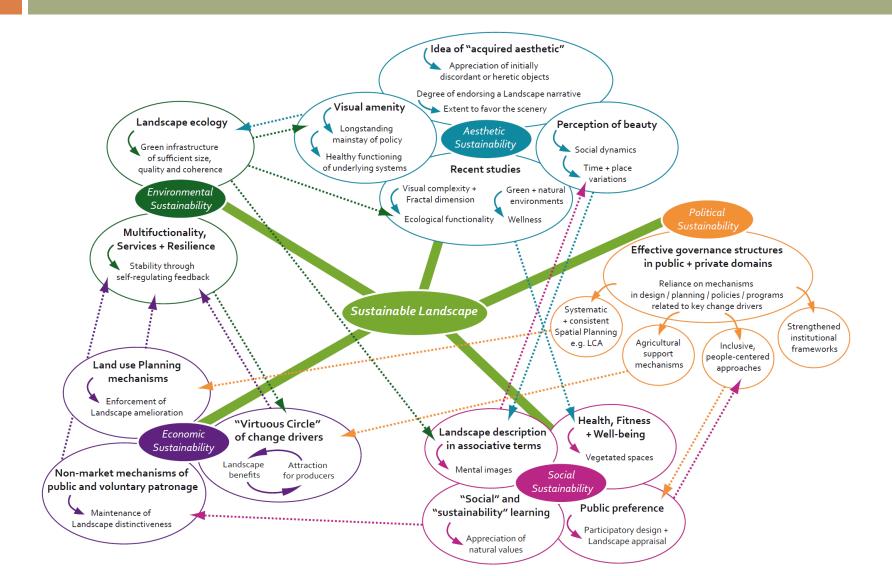

"Meeting the needs of the present without compromising the ability of future generations to meet their own needs" (Brundtland Commission 1987)

According to Paul Selman's Essay "What do we mean by sustainable landscape? (2008):

 To be achieved by combining professional JNF-KKL forestry skills with constructive feedback from the adjacent communities

Sustainable landscape

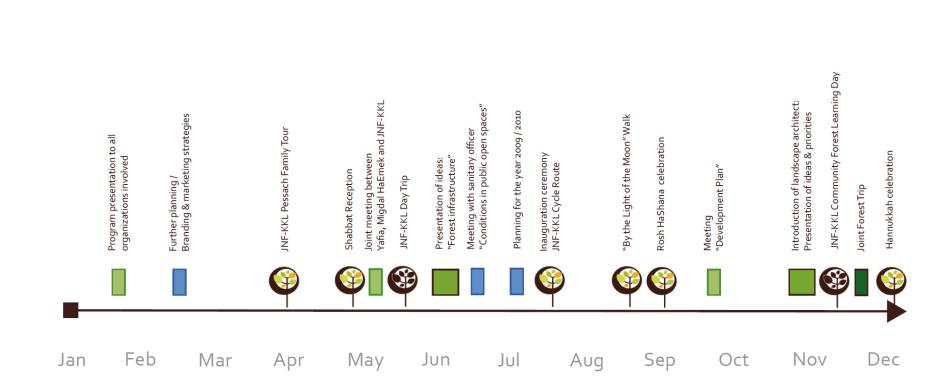

2008

2009

Planning phase

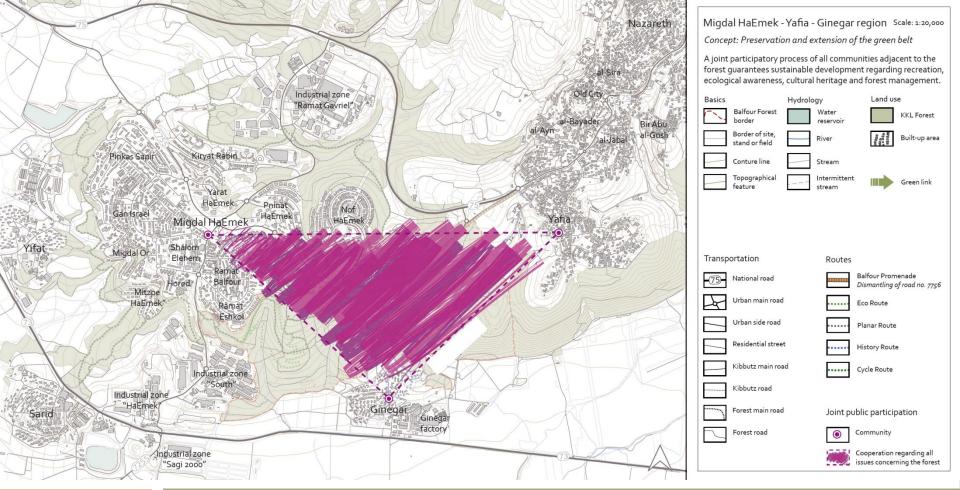

Formal participation in the background

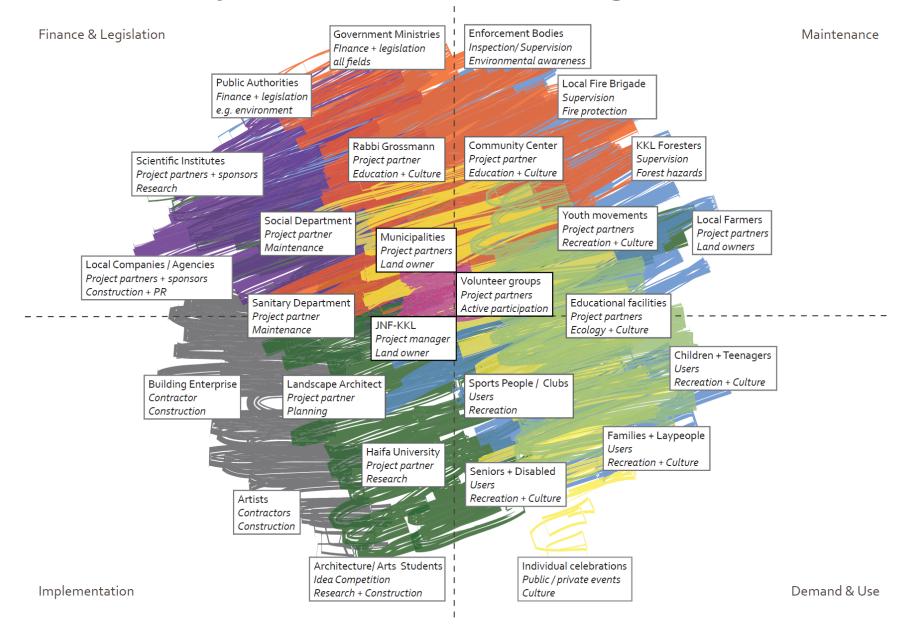

Migdal HaEmek - Yafia - Ginegar //
Preservation & extension of the Green Belt

- To establish Green Links towards urban green spaces and into neighborhoods
- To conduct *land changes* regarding landscape coherence on local level
- To strengthen the *landscape coherence* on metropolitan level

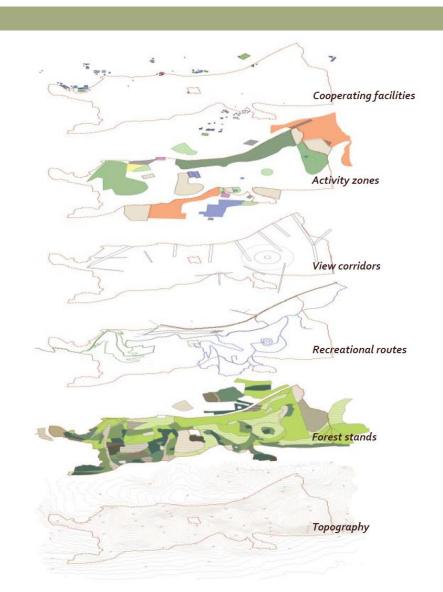

Migdal HaEmek - Yafia - Ginegar // Public participation

- To participate in the management of their immediate environment
- To offer options for *sociocultural encounter, communication and cooperation*
- To enhance *local conditions* together

Components of the development plan

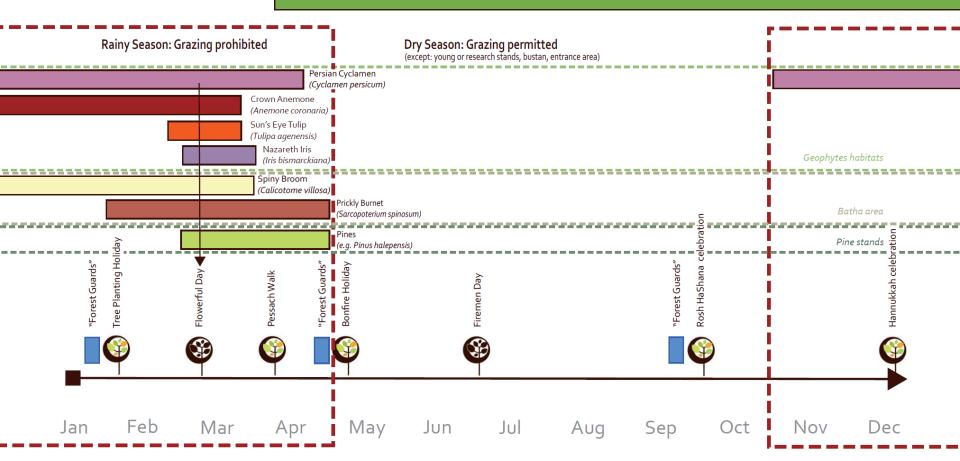

Balfour Community Forest // Landscape features & scenic views

- To preserve important and unique landscape features
- To highlight remarkable scenic view axes and reduce forest fires
- To create a natural mix of dense and medium dense forest stands
- To (re)introduce traditional agroforestry uses

Particular management

blossom

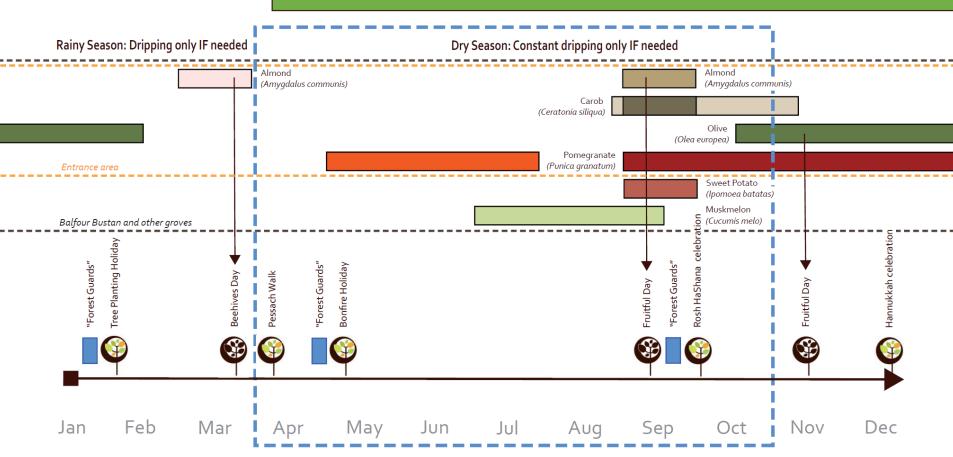

Annual Management Planning - Geophytes habitats, batha and pine stands in general

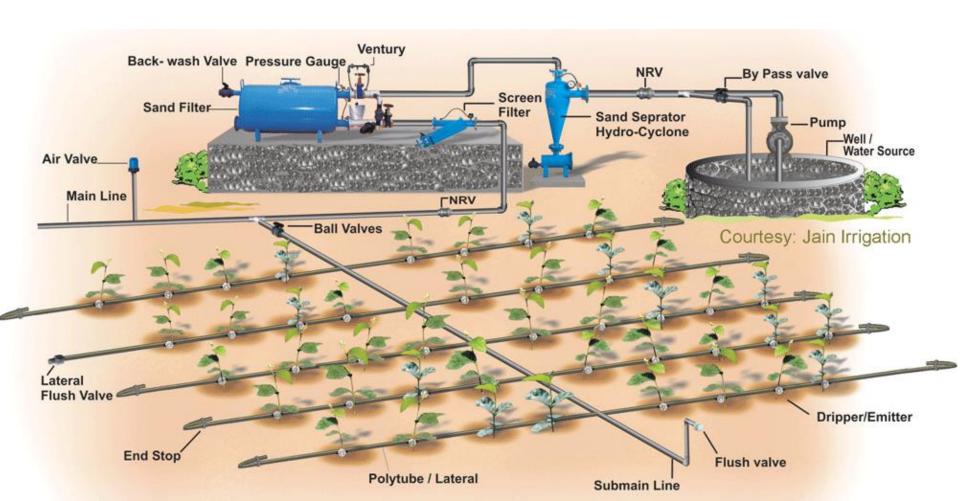

Particular management

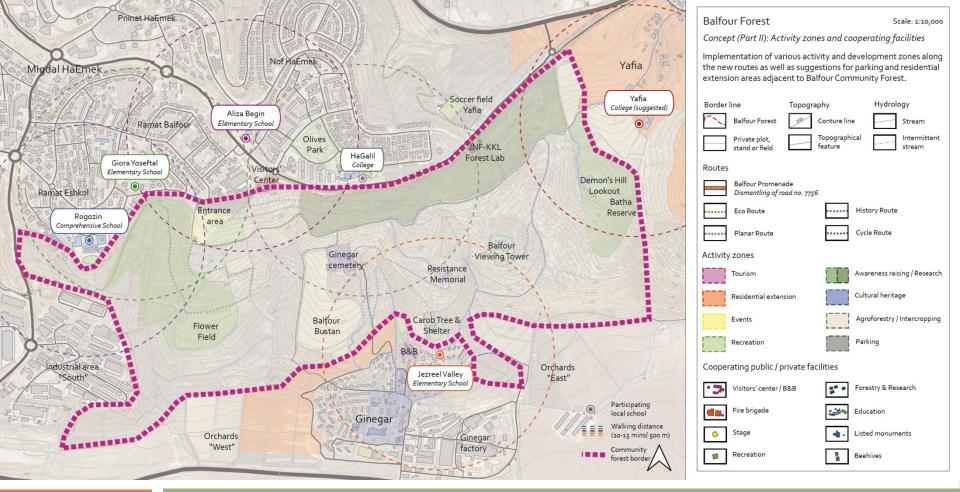

harvest

Annual Management Planning - Bustan, entrance area, groves and orchards in general

Drip irrigation for Balfour Bustan

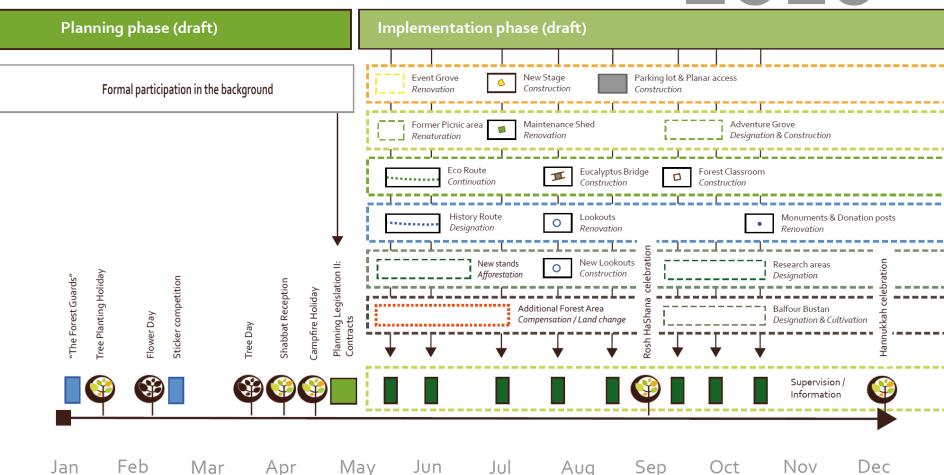

Balfour Community Forest // Activity zones & cooperations

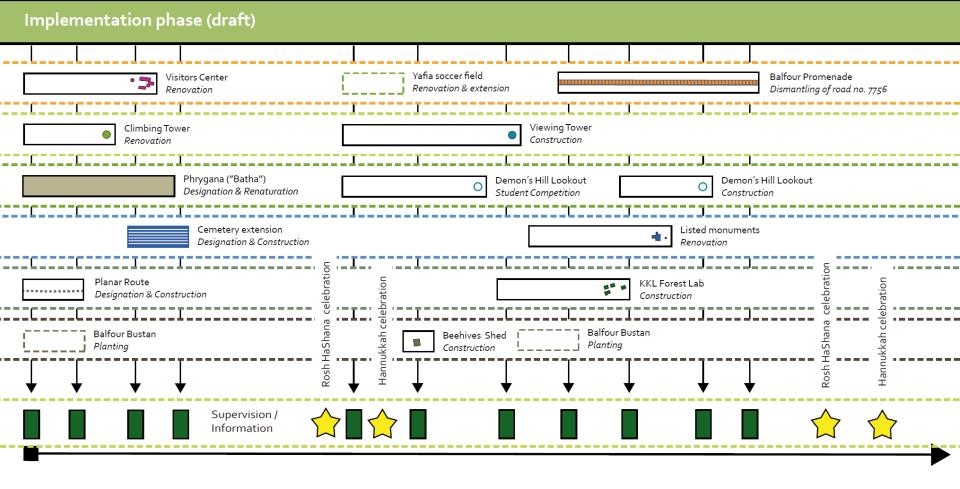

- To propose suitable areas for *parking and residential extension*
- To preserve *cultural heritage sites*
- To suggest reuse or redevelopment of existing infrastructure
- To involve *local schools* into the project and long term maintenance

Project result expectations

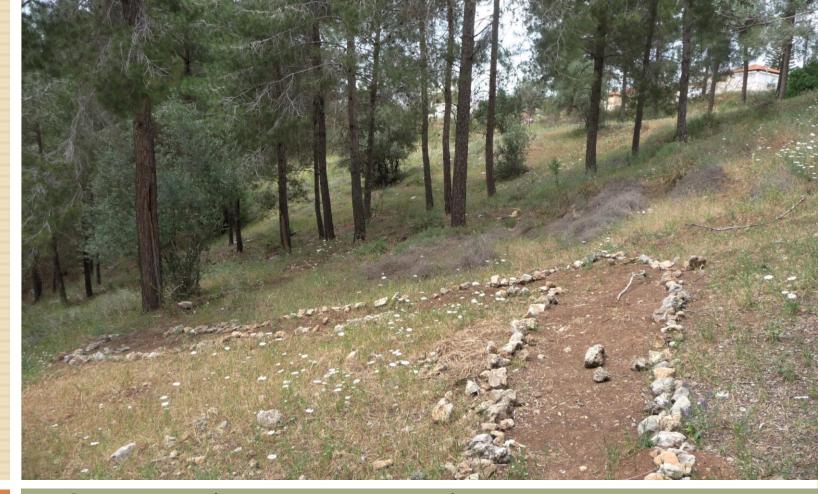

Design proposals for specific forest areas

Balfour Community Forest // Detail area Eco Route

- To emphasize protected geophytes in different forest stands
- To raise ecological awareness
- To establish public partnerships for maintenance with nearby schools

Balfour Community Forest // Detail Eco Route

Balfour Community Forest // Detail Signs

Balfour Community Forest // Detail Forest Art

Balfour Community Forest // Detail Forest classroom

Balfour Community Forest // Detail Eucalyptus Corridor

Balfour Community Forest // Detail

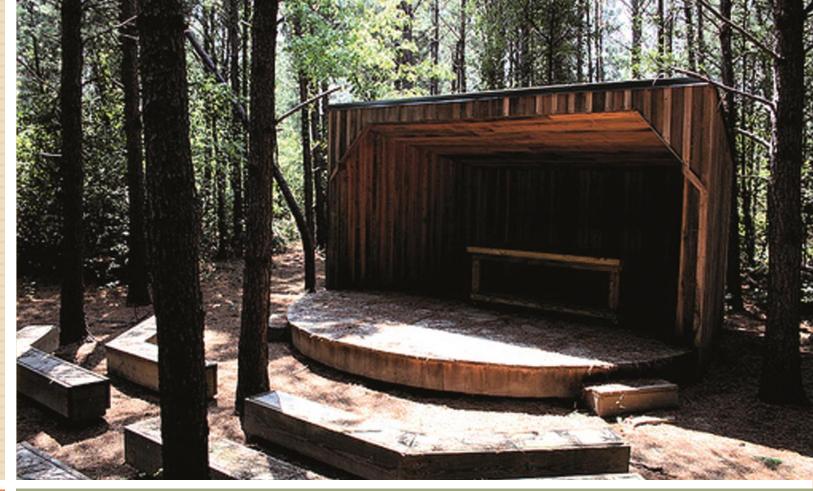

Adventure Grove

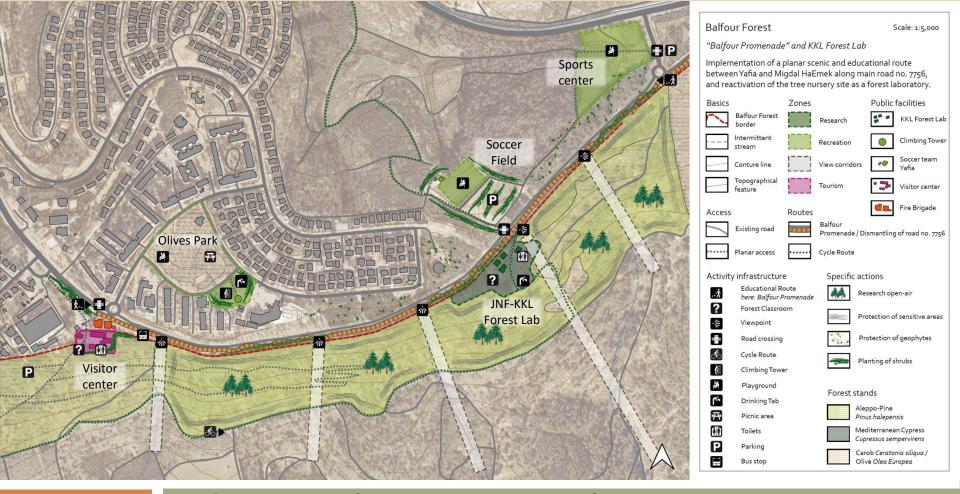

Balfour Community Forest // Detail Campsite

Balfour Community Forest // Detail Picnic tables

Balfour Community Forest // Detail Forest stage

Balfour Community Forest // Detail area Balfour Promenade

- To implement a safe pedestrian and bike route between Migdal HaEmek and Yafia
- To offer opportunities for social encounter "on the way"
- To enable several view corridors towards Jezreel Valley

Balfour Community Forest // Detail Promenade design

Balfour Community Forest // Detail Sitting walls

Balfour Community Forest // Detail Viewpoint

Balfour Community Forest // Detail Scenic view map

Balfour Community Forest // Detail

JNF-KKL Forest Lab

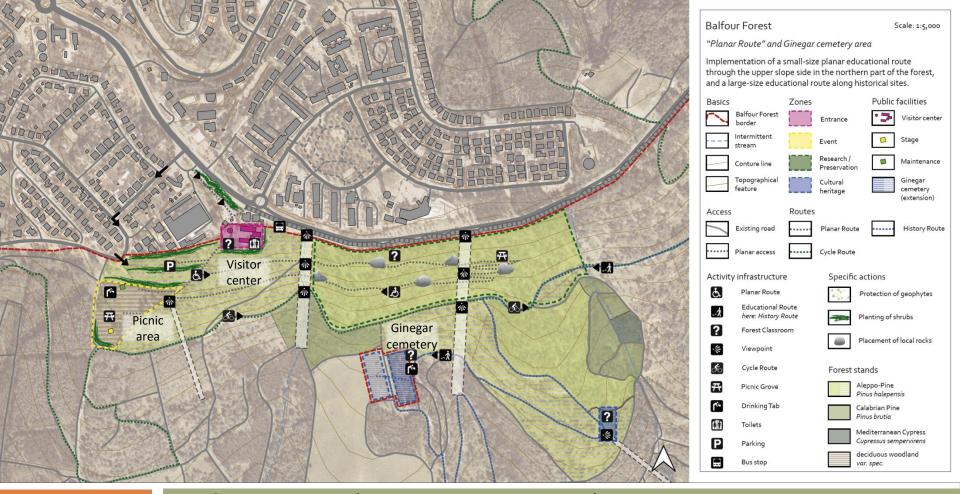

Balfour Community Forest // Detail

JNF-KKL Plant Nursery site

Balfour Community Forest // Detail Road crossing

Balfour Community Forest // Detail area Planar Route

- To ensure *comfortable moving on level ground* for people with special needs
- To create *accessible connections* to the entrance area
- To enhance attraction and safety by offering *special equipment*

Balfour Community Forest // Detail Bollards

Balfour Community Forest // Detail

Entrance area

Balfour Community Forest // Detail area Route design

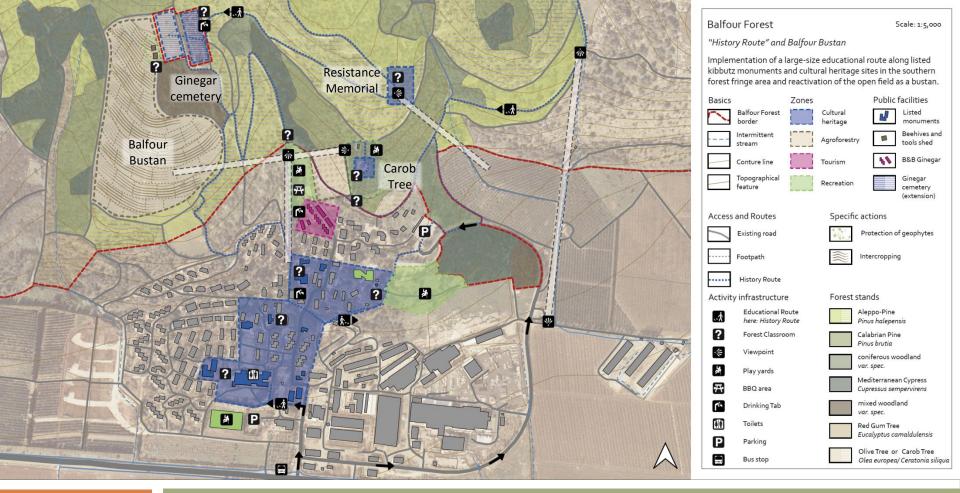

Balfour Community Forest // Detail area Curve design

Balfour Community Forest // Detail Picnic tables

Balfour Community Forest // Detail area Planar decks

Balfour Community Forest // Detail area History Route

- To explore the kibbutz and its traditional land uses: intercropping and beekeeping
- To offer view corridors from/towards elements of cultural heritage
- To inform about *local Arab and Jewish history* objectively

Balfour Community Forest // Detail Sign

Balfour Community Forest // Detail

Magical corner

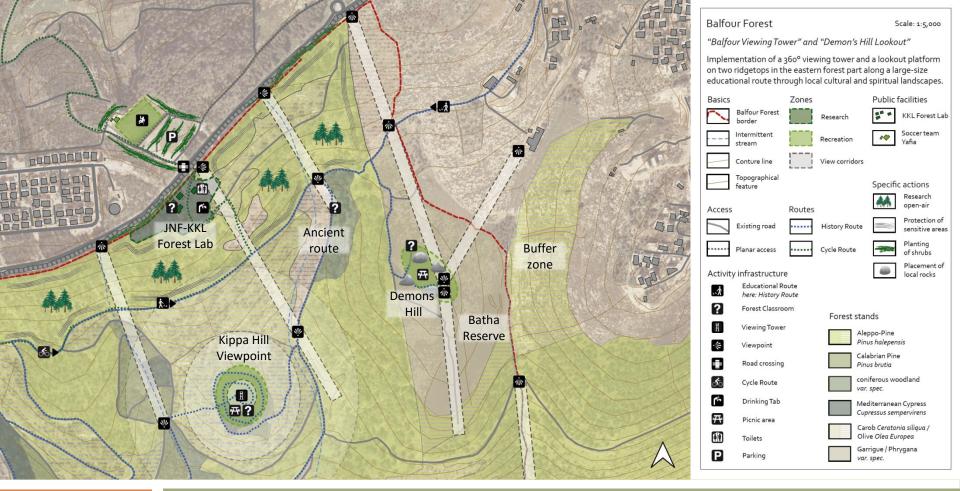

Balfour Community Forest // Detail
Carob tree meeting area

Balfour Community Forest // Detail
Beekeeping station

Balfour Community Forest // Detail Balfour Bustan

Balfour Community Forest // Detail area Kippa Hill & Demons Hill

- To explore traces of ancient settlements and traditional land uses: olive grove
- To implement a view tower as a *landmark for the Jezreel Valley*
- To create a *lookout and picnic area* in the batha reserve for Yafia residents

Balfour Community Forest // Detail Route design
